

Python Interview Questions

1. Explain about python
2. Explain why python is one of the fastest growing programming language in the world
3. Explain the about various features of python
4. Differences between web development and software development
5. Explain about python interpreter programming language
6. Explain about Dynamically Typed Programming language
7. Explain about Object Oriented Programming Language
8. Why we can represent data in the form objects in python
9. What is the difference b/w primitive types data and object types data
10. What is the latest version of python and how it is differ from other versions
11. Explain the differences b/w compiler and interpreter
12. Explain about compiled and pre-compiled languages
13. Diff b/w programming language vs scripting language
14. What is data type in python and its types
15. Mutable and immutable objects in python
16. Diff b/w Mutable and Immutable objects in python
17. Difference b/w Iterable objects and Non-Iterable objects
18. What is statement in python and explain different types of statement in python
19. Difference b/w conditional statement and Looping Statement
20. Difference b/w while loop and for loop in python
21. What is the use of for-else statement in python
22. Explain about use of break and continue statement in python
23. Difference b/w break and continue statement in python
24. How we can read the data from the user in python
25. Why we need type conversions functions in python and what is advantage of using them explain it with example program.

26. Explain about split() function in python
27. Explain about use of split() function in different ways
28. Explain about map() function in python
29. Difference between map() object and other objects in python
30. Explain about join() function in python
31. Difference between POP and OOPs paradigms in programming languages
32. Explain about for loop and for-else loop with example program
33. Explain about slice operator in python with example programs
34. What is slicing and explain with example program
35. What is slice operator and how does it work with example
36. Difference between slicing and slice operator in python
37. Difference between slicing and indexing in python
38. Compare slicing over the split() function
39. Difference between range() and map() function
40. Explain about list data type in python
41. What is membership operator and how does work with example program
42. What is difference between is operator and = operator with example program
43. What is a function in python
44. What is def keyword and how it is important in python
45. What is difference between division and floor division in python
46. What is difference between int object and string object
47. Explain about list object in python
48. What is append() function and how does it work?
49. What is extend function and how does it work?
50. Difference between append() function and extend() function in python
51. What is insert() function and how does it work?
52. Difference between insert() function and append() function?
53. What is remove(), pop() and del() functions in python?

54. Difference between remove() and del() function in python?
55. Difference between pop() function and del() function in python
56. Difference between remove() and pop() function in python
57. Explain about count() and index() function in python?
58. Explain about sort() and sorted() function in python
59. Difference between sort() and sorted() function in python?
60. What is python decorator?
61. Explain about pass statement in python?
62. What is namespace in python?
63. What is Generator in python?
64. Explain about zip() function in python?
65. Explain about enumerate () function in python?
66. Explain about module in python?
67. What is Indentation in python?
68. Explain about replace() function in list?
69. Difference b/w C and python?
70. Difference b/w class and object?
71. What is bytecode in python?
72. Difference b/w compiled code and byte code?
73. Difference b/w function and method?
74. What is PEP8 in python?
75. What id Doc string in python?
76. Why we write comments in python?
